FYI

Our little distillery can only sell the liquors we produce, and we cannot sell beer or wine (maybe one day!). Each batch is under 150 gallons at the start and only produces around 15-20 gallons of drinkable alcohol.

Sometimes we run out of things, which means it may be a couple of days before we have more of that product. We are ramping up, but it is a SLOW process. We appreciate your patience while we iron out our kinks in the distillery and in our kitchen. If something is not right,

PLEASE let us know and we will do our best to fix it!
